Healing Services

Spiritual Healing & Counseling

The Shamanic Practitioner utilizes a healing ceremony and selects the most appropriate energy medicine techniques. The Shamans of the Institute have acquired many sacred healing rituals to facilitate the elimination of dis-ease and restore harmony and happiness. A typical session includes an interview/assessment of the concern/issue. The practitioner determines the location of the source of dissonance and then disengages the energy form. A healing ritual is performed to alleviate the discomfort, pain or symptom(s). Session(s) conclude with further directions and a blessing to complete the healing.

Divination

Divination is a reading by the shaman of your soul's luminous energy body. You are given information on your past, present, and future. Subjects addressed may include: Spiritual Growth, Finances, Health, Relationships, Career, Past Lives, Relocation, Soul's Purpose, Your questions and Soul Wounds.

Soul Retrieval

Soul Retrieval is an ancient healing technique that restores soul loss. It is certain that everyone will experience some amount of soul loss because of social relationships and karmic lessons. The effects of soul loss result in feelings of powerlessness, difficulties in relationships or an inability to choose intimacy. Soul Retrieval is a ceremony in which the Shaman returns the lost pieces of the soul to you.

Extraction

Extraction is the removal of a spiritual intrusion from an individual that manifests as the existence of a chronic condition, usually in a physical form. The Shaman performs a healing ceremony with you to extract (remove) the spiritual intrusion(s). Extraction may be performed on homes and work settings. The ceremony returns integrity to the soul, motivation to the body and happiness to the heart.

Past Life Regression Therapy

The intention is to heal a karmic lesson by utilizing past life, age, pre-natal, or dreamtime regression. The regression technique has been found to be an effective method to access memories from the unconscious, that when processed create a holistic shift in consciousness.

Hypnosis

The structured protocol is safe and relaxing while providing an opportunity for the subconscious to receive a suggestion for change. Some of the applications of hypnosis are to change negative/addictive behaviors, i.e. smoking, overeating, alcoholism and stress, to behaviors that promote a healthy lifestyle.
